Caring, competent, professional

Offering complete plumbing, heating and air-conditioning services for homes both old and new

BY AMY NELSON-MILE

Eight years after founding Alliance Plumbing, Heating & Air Conditioning, Bill Renaud and his wife, Kimberly Lemieux Renaud, have seen the demand for their products and services grow throughout Regina, Moose Jaw and the surrounding areas.

Alliance specializes in residential and light commercial work, and tackles all kinds of projects. Kimberly says, "If you have an older home, we can retrofit your furnace, air conditioner or water heater. As well, we can add a fireplace or repair any of your plumbing."

In addition to working with existing homes, Alliance provides everything you need to build a new home. They start with the underground rough-in stage and go all the way to completion when fixtures are installed. With the increasing popularity of radiant in-floor heat, Alliance installs high-efficiency NTI and Viessmann boilers.

Alliance offers all the plumbing, heating and mechanical products necessary for your dream home. There are a variety of high-end brands available. For furnaces and air conditioning, you can pur-

chase the Tempstar brand. For fireplaces, you can choose from Napoleon and Montigo. There are numerous brands of water heaters, including Navien, Rinnai and John Wood. The list of plumbing-fixture companies is lengthy, but includes Delta, Neptune and Toto. Alliance also sells gas barbecues, garage heaters and ventilation systems.

Kimberly points out that they can install everything they sell. This ranges from the plumbing fixtures to the furnaces, air conditioners, fireplaces, water heaters and boilers.

As well as the installations and retrofitting, Alliance does service calls—including emergency troubleshooting. "In the winter, when your heat goes out, you want a company that's able to respond promptly," says Kimberly. "Alliance is definitely able to do that—we're available 24/7 to help you, and our turnaround time is very quick."

Alliance employs professional staff. Bill himself has more than 15 years in the industry, and his four employees are highly qualified. Kimberly rounds out the team as Business Manager.

Kimberly explains that one exceptional aspect of Alliance is the professionalism of their workers. "Our staff are experienced and reliable," she says. "Their workmanship is the highest quality because they are meticulous about what they do. They are also very neat—they tidy up after themselves."

Kimberly sums up Alliance's appeal by saying, "When you hire Alliance, you are putting yourselves in the hands of caring, competent professionals who want what's best for you and will provide timely, high-quality service. We provide superb value for your money."
